

**OFFICIAL COMMUNICATION**  
Cross-Country GPS Tracker

The Elite riders in XCO race on Sunday will use GPS trackers for television purposes. These fit under the saddle of the bike.

To give time for team mechanics to fit them, the GPS mount which fits under the saddle will be available to pick up at the Swiss Timing container (located at XCO start/finish) on **Saturday** from **10:00 – 12:00.**

The GPS unit itself will be distributed with the transponder before the race as normal, and this just slides into the mount.

If you miss the GPS mount pick up, they will be still be available during GPS & transponder pick up on Sunday.

**XCO GPS Tracker – Information**

- GPS Tracker is composed of a saddle support and the GPS tracker itself
